Bio

I'm a born and raised Las Vegas native. Had the opportunity to live in Oceanside, California for about 6 years before moving back to Las Vegas. My name comes from a road outside of Baker, California. Parents thought it was cool so they named me after it. Currently working on finishing my Associates in Graphic Communications degree. I've been passionate about art and design since I was young and want to make a career out of it. Other things that I'm passionate about is being with my Husky dog, Dusty, and learning different skills through Udemy. Skills centered around drawing skills, writing, and game design.
